Note: The following has been taken from the Florists' Review, under date of December 3rd, 1914:

Few new varieties appear and stand up as commercial sorts. This is specially true of the large exhibition sorts. The most largely grown and popular chrysanthemum still is the old reliable Bonaffon. Growers are nearly unanimous in stating that there is still more money in this than any other. Other favorite yellows are Golden Glow, the leading early; Chrysolora, Roman Gold, Golden Chadwick, Yellow Eaton, Golden Eagle, Halliday, Ramapo and Colonel Appleton.

Coming to whites, Smith's Advance continues the leader among earlys. Others which find much favor are Polly Rose, October Frost, Clementine Touset, Charles Razer, Miss Alice Byron, Eaton, Ivory, Jeannie Nonin and Chadwick. Ivory seems to be losing favor; its constitution is waning. As fancy whites, some good William Turner and Mrs. Drabble have appeared this year.

Turning to pinks, Glory of Pacific is still heavily grown, as is Pacific Supreme. Chieftain looms up as a winner among midseason sorts. Patty, Winter Cheer, Enguehard and Wells' Late Pink are all in favor. The last named is fine for Thanksgiving if grown cold. The old Maud Dean is grown quite a little. Alice Lemon has proved a good early light pink.

Large Flowering Hardy Chrysanthemums

FERNS—Decorative and Ornamental

NEPHROLEPSIS "ROOSEVELT"

In general characteristics it resembles the world-famous Boston Fern; it produces many more fronds than the Boston, thus making a bushier, handsomer plant. In fact, it is the best Fern for florists' use ever introduced. Roosevelt will make a better plant in a six-inch pot than any other Fern in a ten-inch pot. That is what will make you money every time. The usual size to sell the Boston Fern is from a six-inch pot. Well, let us tell you that in a six-inch pot of the Roosevelt and the Boston there is no comparison. The Roosevelt doubles the fronds of a Boston in a six-inch pot, thus making a much more finished plant, and, therefore, more saleable. The pinnae are beautifully undulated, giving the Roosevelt a pronounced wave effect seen in no other Fern; as the plant ages this effect becomes quite distinct. Price, 2½-inch pot, 50c per doz.; \$4.00 per 100; \$37.50 per 1000. 5-inch pot, \$2.00 per doz.; \$15.00 per 100.

BOSTON FERN

(*NEPHROLEPSIS EXALTATA BOSTONIENSIS*)—This plant is so well known it needs no description. The drooping habit of the long, graceful fronds makes it an excellent plant to grow as a single specimen for the table or pedestal. Price, strong 2½-inch stock, 50c per doz.; \$3.50 per 100; \$30.00 per 1000. 3½-inch pot, 75c per doz.; \$5.00 per 100; 4-inch pot, \$1.50 per dozen; \$12.00 per 100.

THE DWARF BOSTON FERN

(*NEPHROLEPSIS SCOTTII*)—A compact dwarf form of the favorite Boston Fern. Price, strong 2½-inch pot plants, 50c per doz.; \$3.00 per 100.

Roosevelt Fern

NEPHROLEPSIS SCHOLZELI

The ideal plumed Fern, holding the same position to all other plumed varieties that Scotti holds to the old Boston. It is a sport from Scotti, possessing all of the merits of that most popular variety, but with the pinnae subdivided, giving it an airy, feathery appearance. Price, 2½-inch pots, \$4.00 per 100. 4-inch pot, \$2.00 per doz.; \$15.00 per 100.

Whitmanii

NEPHROLEPSIS WHITMANII

"The Ostrich Plume" Fern, *Nephrolepis Whitmanii*. The graceful pluminess and charm of the new *Nephrolepis*, its characteristic features of shape, size and growth, give it distinction and superior commercial value. The *Whitmanii* is of dwarf growth and wide upright, stocky shape. The fine cut fluffy fronds stand erect and have proved little liable to revert to the original Boston type. The pinnae sub-dividing make miniature fronds which are superimposed on the main fronds, looking as if two or even three were contained in one. Each frond or branch has a double row of perfect little fronds set at right angles to the mid-rib. Price, strong 2½-inch pot, 50c per doz.; \$4.00 per 100; \$37.50 per 1000.

ELEGANTISSIMA COM-PACTA—The Dwarf Elegantissima. Price, 2½-inch pots, 75c per doz.; \$5.00 per 100.

GREVILLEA ROBUSTA (Silk Oak)—A magnificent plant for decorative purposes; of rapid, easy growth, fully cut foliage, rivaling a rare Fern. OLIVIA (Hill, 1907).—The ideal red bedding Rose; was always just a little ways ahead—never quite reached. Such varieties as Meteor, Helen Gould, General M. Arthur, Gruss an Teplitz, Etoile de France each lack something to make them ideal. Rhea Reid came nearer the mark in some localities, but now comes Olivia, coming under the wire first an easy winner. JEANNE D'ARC (Levasseur, 1909).—Among all the recent white "Baby" Roses this pretty variety stands pre-eminent first. It is an ideal sort for pot culture, having a round, compact habit, with very full trusses of evenly disposed flowers, which are small, very full, perfect in form and of glistening snow white; it comes into bloom on the very smallest plants and lasts well, being perpetual during the summer; fine for hedging purposes, as it is a sheet of white. shaded to the center with

rosy pink.

COQUETTE DES ALPES

(Lacharme, 1868).—Pure

blush on first opening.

GLOIRE LYONNAISE.—Color

rich creamy-white, passing

when open to a pale shade

of salmon-yellow, deepest at center.

GIANT OF RATTLES.—This is still esteemed as the

very best rich red Rose; very large, double, full

and sweet; excellent.

GENERAL JACQUEMINOT.—Bright red, fragrant,

extra. This is too well known to need description.

ORLEANS ROSE (Levasseur, 1910).—The showiest and prettiest of all the Baby Ramblers. This charming and dainty Rose is of beautiful rounded habit and is a huge bouquet of deep cerise or Geranium-pink with distinct showy center of pure white; florets not crowded but of beautiful arrangement, making as a whole a charming combination that cannot be beaten. The color is irresistible. The plant grows like a weed and the flowers are nearly "immortelle" in their lasting qualities. We believe that they will outlast almost any other Rose in existence with their stiff paper-like texture. This pretty Rose has taken Europe by storm and will make a sensation as soon as known in this country. Awarded gold medal. Price, 50c per doz.; \$4.00 per 100. 4-inch pot, \$1.50 per doz.; \$12.00 per 100.

HARDY CLIMBING ROSES NEW AND STANDARD VARIETIES

Red Dorothy Perkins (Excelsa)

RED DOROTHY PERKINS (Excelsa)—It is a good deal to claim for a Rose, but we are within bounds when we describe Excelsa as a brilliant Crimsun Rambler flower on glossy, varnished Wichuraiana foliage. The defects of Crimsun Rambler are its unsightly foliage in unseasonable weather, and its defoliation by insects; the infusion of Wichuraiana blood assures an ornamental climber which is nearly evergreen, and this will assure this lovely crimson-scarlet pillar Rose a place in every American garden, for it is quite hardy in addition to all its other fine points. Price, 50c per doz.; \$3.00 per 100, 2-year plants, 4-inch pot, \$9.00 per 100; 1-year field-grown, \$10.00 per 100.

AMERICAN PILLAR (Conard, 1909.)—Climbing Polyantha. A new single flowering Rose with blooms two to three inches across, borne in immense clusters. Color lovely apple blossom-pink with bright golden stamens followed in autumn with red hips. A great Rose to grow in pots for Easter.
